

# Hummingbird Moment Book Nook

## Assembly Instructions

1. Gather and identify all of your parts.

2. Assemble left side, bottom and back as shown below – using glue.

3. Mount your lights by stringing them through the hole in the back panel and folding them back and forth as shown below. They can be kept in place by first placing the glue dots (supplied) on the wood, or by squeezing a blob of CA glue in a couple of spots over the wires after they are in place. Make sure there is nothing crossing over the line labeled as "4".

4. Mount all of the panels matching the number on the back of the panel with each of the lines on the bottom and left side. Use glue on the bottom and left side of each panel. Make sure that the panel is mounted in front of the marked lines. Each panel is labeled on the back to match with the corresponding line.

5. The panel labeled "front" should be mounted flush with the front edges.
6. Glue the right side in place.
7. Glue the top panel in place.
8. Mount the battery pack for your lights to back of book nook!

**YOU DID IT!**

**ENJOY!**
